

Septic Tank Remediation Program

Additional Resources

- [Presentation Slides](#) – Provides overview of program description and qualifications as well as general septic operations.
- [EPA Septic Education Materials](#) – [New Homebuyer’s Guide](#) and [SepticSmart Infographics](#)
- [Septic Inspections](#) – Inspections can be conducted by a licensed Installer or Designated Representative (septic designer and soil analyst). These license holders can be searched by proximity to a given zip code through the Department of Health website [here](#). Select the License Type of interest from the drop down.
- [Locate Your Watershed](#) - To identify if a home is located in one of the watersheds that make up the program area, use the [Find Your Watershed](#) tool provided by the University of Arkansas Center for Advanced Spatial Technologies. After entering the property address, look for the name under “8-Digit HUC” on the right side of the page.
- [Complete Pre-app](#) – Homeowners who believe they may qualify for the program are encouraged to complete the pre-application form for their watershed’s managing organization at the links below:
 - For the Beaver Reservoir Watershed, submit to [OWW](#)
 - For the Illinois River Watershed, submit to [IRWP](#)
- [Septic Permits](#) - Septic Permits can be accessed from the GIS parcel records for Benton and Washington counties. Summary instructions below.
 - For [Benton county](#): *Search/Text* to find the address; Turn on the *Environmental/Septic* layer; *Search/Identify Features/Septic Permits* layer; Draw a box around the septic permit icon (orange dot); Open the document.
 - For [Washington county](#): *Switch to Advanced Search*; Search by name or address; Select *Map It* for the property of interest; Any septic permit (green dot icon on the map) will be linked on the right above *Parcel ID*.
- [County Health Unit](#) - Questions about permitting and local septic regulations can be directed to an Environmental Health Specialist at the [county health unit](#) of the home address in question.
- [Program Manager Contacts](#)
